Description:

Villa & Apartment Selling Website

A modern, responsive real estate website built using **HTML5** and **CSS3**. This project showcases a clean and attractive user interface for buying and selling villas and apartments. It is designed to provide an engaging browsing experience across desktops, tablets, and mobile devices using responsive design techniques.

Features

- Responsive design using **CSS Media Queries**
- Modern and clean user interface
- Home, Properties, Property Details, Contact
- Attractive property listings with images and descriptions
- Mobile-friendly navigation
- Well-structured and semantic HTML
- Smooth layout with Flexbox and CSS styling

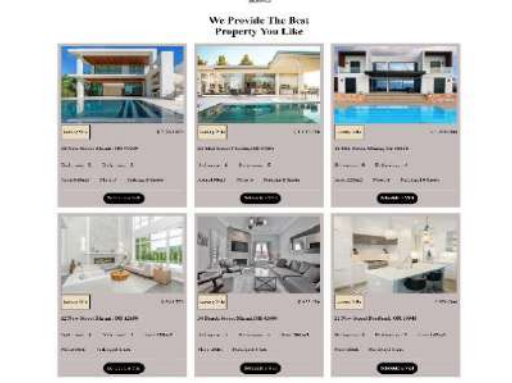

Technologies Used

- HTML5
- CSS3
- CSS Flexbox
- Media Queries (Responsive Design)

Purpose

This project was created to practice front-end web development concepts, including semantic HTML, responsive layouts, CSS styling, and media queries. It demonstrates the ability to build a visually appealing and user-friendly real estate website without using JavaScript or external frameworks.

Feel free to explore the project, provide feedback, or contribute!
